

# Taipei Internet Exchange (TPIX)

The top Internet exchange point between Taiwan and the world. TPIX provides peering network platform for everyone to easily and effectively exchange Internet traffic in Taiwan.

As the No.1 carrier neutral IDC ecosystem in Taiwan, Chief IDC aggregates lots of global and domestic carriers, ISPs, ICPs and Internet value-added service providers. Chief IDC not only provides a secure and stable collocation services but also a network-rich interconnection environment, which is the Taipei Internet Exchange (TPIX) peering platform.

Established in Mar. 2002, TPIX is built for the purpose of providing neutral Internet traffic exchange services for ISPs, ICPs and enterprises to exchange Internet traffic economically and effectively. TPIX member will enjoy benefits such as better network performance, better redundancy and cost saving via public peering or private peering services.
